MI Batting Scorecard — Full Season						
All batsmen · runs, strike rate, avg per innings, boundaries						
batsman	Sum of innings	Sum of total_runs	Sum of strike_rate	Sum of avg_per_innings	Sum of fours	Sum of sixes
RD Rickelton	12	448	186.70	37.30	31	38
SE Rutherford	7	123	164.00	17.60	5	12
Q de Kock	3	132	163.00	44.00	9	9
RG Sharma	9	283	157.20	31.40	21	21
SA Yadav	13	270	147.50	20.80	28	10
Naman Dhir	14	318	147.20	22.70	31	13
Tilak Varma	14	359	145.90	25.60	30	17
HH Pandya	10	206	138.30	20.60	21	7

- ALL 3 phases score fewer runs in losses — not 1 area, everything drops
- ⚠️ Tilak + Rohit avg 45+ run gap between wins and losses — flat-track bullies
- 🔴 6 matches with 3 or 3+ PP wickets → happened in 60% of losses, crippling the innings early
- 💀 Sub-30 death runs vs CSK (24.5) & RR (28) — severe finishing collapses in losses
- ✅ Naman Dhir and Hardik — only 2 players truly consistent in wins AND losses

Bowling & Extras — The Execution Failure

Death economy 11.17 · 130 extras in 14 matches · Bumrah alone cannot win matches

Wicket Type Breakdown

bowler	Sum of matches	Sum of wickets	Sum of overs_bowled	Sum of runs_conceded	Sum of economy	bowling_avg	bowling_sr	Sum of wides	Sum of noballs	economy_grade
AM Ghazanfar	11	15	38.80	389	10.02	25.9	15.5	6	0	Average
Ashwani Kumar	3	6	10.00	102	10.20	17	10.0	4	0	Average
C Bosch	6	12	20.20	195	9.67	16.2	10.1	3	2	Average
DL Chahar	8	8	25.50	265	10.39	33.1	19.1	9	0	Average
HH Pandya	9	4	22.70	259	11.43	64.8	34.0	13	2	Expensive
JJ Bumrah	13	4	49.00	410	8.37	102.5	73.5	18	7	Good
Krish Bhagat	3	0	6.00	63	10.50	NULL	NULL	0	0	Average
M Markande	3	0	5.00	76	15.20	NULL	NULL	1	0	Expensive
MJ Santner	4	5	14.00	125	8.93	25	16.8	3	0	Good
RA Bawa	2	2	4.00	50	12.50	25	12.0	8	1	Expensive
Raghu Sharma	5	1	15.00	130	8.67	130	90.0	0	0	Good
SN Thakur	7	12	22.00	270	12.27	22.5	11.0	16	2	Expensive

- 🎯 Bumrah 8.37 economy — only truly elite bowler in MI's attack across 14 matches
- 🔴 Pandya 15.8 death eco — worst death bowler · bowled 16 overs in death across season
- 🔴 NEED NEW TALENT — Young talents have a very bad economy rate. At least one good young Indian first bowler needed.
- 🔴 Trent Boult — 12.33 eco when MI in Losses and only take 2 Wicket for MI. So go for a solid Foreign Fast Bowler

7	FINAL VERDICT	All 14 matches	4W-10L with Rohit, Bumrah, Tilak, Rickelton, Hardik, de Kock in XI	T20 is won in 5 overs: 1-6 batting, 16-2

🔪 Why Does Mumbai Indians Lose Despite a World-Class XI?

The Data Answer: Mumbai Indians has the talent to win every match — Rohit Sharma, Jasprit Bumrah, Tilak Varma, Rickelton, Hardik Pandya, Quinton de Kock. The problem is not talent. The problem is **execution in the 10 most important overs of every T20 match**.

Overs 1–6 (Powerplay): MI averaged only 52.30 runs and lost 3+ wickets in losses. In wins they averaged 64 runs with no early wickets. The platform is set or lost in the first 6 overs.

Overs 16–20 (Death): MI conceded 10.73 runs/over — ranked 7th of 10 IPL teams. Pandya (15.75), Thakur (12.67), Dipak(12) are liabilities. Only Bumrah (8.61) is world-class, and he cannot bowl all 5 death overs alone.

The uncomfortable truth: MI's world-class stars — Rohit, Tilak, Rickelton — all average 45–58 runs MORE when MI wins easily. When the game is close and pressure is highest, they disappear. This is a **mental and execution problem**, not a technical one.

Fix these two things and MI wins: ① Aggressive powerplay batting (target 65+ in overs 1–6) · ② One specialist death bowler (economy target <8.5)

Economy >11 = LOSS every time — most predictive single stat in MI's 2026 season

MI ranked 7th of 10 teams in death bowling — KKR's 9.49 vs MI's 11.09 = 8 extra runs per match

T20 formula: Fix PP batting (overs 1–6) + Fix death bowling (overs 16–20) = fix everything
